Fresher Java Backend Developer | TP.HCM

Objective

Seeking a Java Backend Developer position to apply my knowledge of Java and Spring Boot in building reliable and scalable backend systems while continuously improving my technical skills.

Education & Certifications

Ho Chi Minh City University of Technology (HCMUT) TP.HCM, Vietnam
Bachelor of Computer Science *09/2022 – 10/2026*

- **TOEIC Listening & Reading: 705** (05/2026)
- **TOEIC Speaking & Writing: 210** (09/2026; taken at HCMUT)

Experience

Java Backend Developer Intern 04/2025 – 10/2025
Công ty TNHH Tư vấn và Phát triển Giáo dục InnEdu

Learnmigo

- Developed user management features and bulk-imported questions from Excel files.
- Developed a gamification system featuring user rankings and level-based feature unlocking.
- Fixed backend bugs and resolved frontend integration issues based on code review feedback.

Resource Marketplace

- Implemented authentication and role-based access control using JWT and Spring Security.
- Implemented direct-to-storage file uploads using S3-compatible presigned URLs.

Projects

Library74 — AI-powered Library Management System 10/2025 – 05/2026
Graduation Project: 9.2/10 *GitHub* | *Demo* | *Video* | *Report*

- **System Architecture:** Designed a Spring Boot modular monolith with domain-oriented Maven modules, JWT/OAuth2, RBAC, and Kafka-based asynchronous notifications.
- **AI Chatbot:** Built a Gemini-powered chatbot with RAG, function calling for authenticated data retrieval, and Redis-based conversation memory.
- **AI Integration & Semantic Search:** Built a FastAPI PDF processing pipeline for text extraction, chunking, and Gemini-based metadata extraction; implemented SBERT embeddings and pgvector search, achieving 87.5% Recall@5 and 0.907 nDCG@5.
- **Recommendation System:** Implemented personalized book recommendations using content-based filtering, ALS, and trending-based fallback.
- **Database & Reliability:** Designed PostgreSQL schemas, managed Flyway migrations, implemented row-level locking, and cached recommendation rankings in Redis.
- **Testing & Deployment:** Tested business logic and transaction rollback using JUnit, Mockito, and Testcontainers; deployed to a Linux VPS using Docker Compose and GitHub Actions CI/CD, with database backups and health checks.

Technical Skills

Languages: Java, SQL
Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, JWT, OAuth2
Data & Messaging: PostgreSQL, Redis, Apache Kafka, Flyway
AI & Machine Learning: Gemini API, RAG, SBERT, Semantic Search
Testing: JUnit 5, Mockito, Testcontainers, Gatling
Tools: Git, Maven, Docker, Linux, Nginx, GitHub Actions
